

HMS Enterprises — Dashboard Fit Assessment

Prepared for: HMS Enterprises (Chennai & Trichy)

System: HMS Enterprises internal CRM (NovaCRM)

Sources: Client paper forms (Service Report, Govt Stamping chit, Quotation/Proforma) + hmsenterprises.in

1. Executive summary

HMS Enterprises runs on **three paper workflows** plus a broad product range (weighing scales, billing machines, Touch POS, office automation, govt stamping, AMC, rental, buy-back).

The current CRM is **strong as an internal operations hub** (customers, machines, service jobs, stamping reminders, sales pipeline, inventory serials). It is **not yet a full paper replacement** for HMS's pink forms or govt compliance documents.

Overall fit for HMS paper workflows	~6 / 10
Customer & machine hub	8 / 10
Field service workflow	7 / 10
Stamping operations	6 / 10
Sales / quotation	5 / 10
Govt compliance / PDFs	3 / 10

Recommendation: Position the system as *one place for customer + machine + service + stamping reminders + sales* — then add **Phase 1 printouts and compliance fields** to eliminate pink pads.

2. What HMS actually does

From the client forms and [HMS Enterprises website](https://hmsenterprises.in):

Line of business	Real-world work
Sales	Weighing scales, billing machines, Touch POS, office automation (Chennai Saidapet + Trichy)
Service	Breakdown repair, OEM spares, AMC
Compliance	Govt stamping / calibration (Dealer Licence 3161, Repairer Licence 2152 on forms)
Other	Rental, buy-back, installation (on website — not yet in CRM)

Paper workflow chain

3. Form 1 — Quotation / Proforma Invoice

Example from client: Order No. 4977 · Mr. Ramesh · Table top 50 kg · ₹5,500 – ₹200 discount = ₹5,300 · Cash · Delivery 14/8/24

Paper field	CRM module	Status
Quote no. & date	Sale tracking + Invoices	Partial — no dedicated proforma
Customer name, phone, area	Customers	✓ Good
Product (Table top 50 kg)	Products catalog	✓ Good
Rate, qty, special discount	Invoices / sale price	✓ On invoice; weak on quote PDF
Payment terms (100% cash)	—	✗ Missing
Delivery date	—	✗ Missing
Battery warranty note	Notes only	✗ Missing structured field
Rupees in words	—	✗ Missing
Customer / company signatures	—	✗ Missing

Today: Log enquiry → pick product → convert → invoice.

Gap: Does not replace the **quotation pad** HMS gives customers before sale.

4. Form 2 — Govt stamping application

Example from client: S.No. 4153 · Kondattam Biriyan · Serial 2025641 · 100 kg / 200 g · Class III · SF ₹400 · Previous VC 1576325/22/04/25/...

Paper field	CRM module	Status
Serial job number	Stamping / tickets	Partial
Customer + full address	Customers	✓ Good
Model, make, serial	Customer machine + Inventory	✓ Good (if entered once)
Capacity max/min, e=10g, Class III	Machine capacity, accuracy	Partial — no Class, no min capacity
Previous VC no./date	—	✗ Critical — missing
SF / OD / CONV fees	Ticket amounts	Partial
Payment notes (Paid / NIL / collector)	Paid/unpaid	Partial — no mode or collector
Dealer / repairer licence on print	—	✗ Missing
Tamil legal layout for govt	—	✗ Missing PDF

Today: Stamping page → record date + next due; **Due / In progress** tabs.

Gap: Tracks **when** to stamp; does not produce **govt submission chit** or **VC history chain**.

5. Form 3 — Service report (pink job card)

Example from client: S.No. 46102 · Classic Enterprises · Engineer Ali · NGC · Battery ₹650 + Service ₹200 + Stamping ₹1,500 = ₹2,350 · GPay · Quarter D

Paper field	CRM module	Status
Job S.No.	Ticket ticketNo	✓ Good

Customer, phone, address	Customers + ticket	✓ Good
Service engineer	Assign engineer	✓ Good
Visit: Service / Stamping / Installation / Sales	Ticket category	Partial
GC / NGC / AMC	Warranty + machine plan	✓ Good
Completed / Paid / GPay	Status + payment	Partial — no payment mode
Complaint + action taken	Description + visit log	✓ Good
Machine capacity, brand, serial	Customer machine	✓ Good
Stamping quarter A–D, VC date, plate no.	—	✗ Missing
Spares line items + total	Spare parts + payment sync	✓ Good (recent fix)
Spare warranty (e.g. battery 6 mo)	underWarranty on spare	✓ Good
CGST / SGST on job	Invoices only	Partial
Printable pink chit + signatures	Basic job print	Partial — not HMS layout

Today: Create job → engineer → spares → mark paid → complete.

Gap: Field staff still need **HMS-style service report** for customer sign-off.

6. Scenarios — coverage matrix

#	HMS scenario	Covered?	Where in CRM
1	Walk-in sales enquiry	✓ Yes	Sale tracking
2	Demo scale before sale	✓ Yes	Sale tracking → Inventory demo
3	Convert sale → customer + serial	✓ Mostly	Convert + customer machine
4	Proforma / quotation to customer	✗ No	Needs quote PDF
5	Delivery + warranty on sale	⚠ Partial	Invoice only
6	New installation job	⚠ Partial	Tickets (no Installation type)
7	Breakdown service	✓ Yes	Service tickets
8	AMC contract service	✓ Yes	AMC + tickets
9	Govt stamping visit	⚠ Partial	Stamping register
10	Stamping renewal reminder	✓ Yes	Stamping due + AMC
11	Spares + labour billing	✓ Yes	Spare parts + ticket total
12	GPay / cash payment tracking	✗ No	Needs payment mode
13	VC number / quarter A–D	✗ No	New fields
14	Chennai vs Trichy branch	✗ No	Single tenant
15	Rental / buy-back	✗ No	Not in scope
16	Daily job register (46101, 46102...)	⚠ Partial	Ticket list

Estimated daily workflow coverage: ~55–60%

7. Current strengths

Strength	Benefit for HMS
One customer record	No re-typing name/phone/address on every form
Machine linked to jobs	Capacity, serial, AMC/GC/NGC in one place
Stamping due / in progress	Replaces manual “who is due” tracking
Demo → sold serial flow	Matches warehouse + sales reality
Spares on ticket + total sync	Matches service report line items
Admin ERP + employee tickets	Office vs field roles

8. Current gaps

Gap	Business impact
No HMS-branded PDFs	Staff still use pink pads for customer/govt
No VC / stamping quarter	Renewal is date-only, not legal reference
No quotation mode	Sales desk still uses order pad
No payment mode	GPay/Cash/NIL Paid stays handwritten
No Chennai / Trichy branch	Hard to route jobs and reports
Website scope (POS, rental, buy-back)	CRM is weighing/service-centric

9. Recommended build phases

Phase 1 — Paper-light operations (highest priority)

1. **Service Report PDF** — match pink chit layout
2. **Machine compliance fields** — VC no., previous VC, quarter A–D, plate no., Class, capacity min, e=dd
3. **Payment on job** — mode (Cash/GPay/UPI), collected by, partial paid
4. **Visit purpose** — Service | Stamping | Installation | Sales
5. **Proforma / Quotation** — quote PDF with discount, delivery date, amount in words

Phase 2 — Stamping desk complete

6. Govt stamping application PDF (licence nos., fee table, Tamil header)
7. VC renewal chain — auto-fill previous VC; next due from VC date
8. Fee templates — SF by capacity/class

Phase 3 — Full HMS alignment

9. Branch — Chennai / Trichy
10. Extended product catalog (billing machines, POS, CCTV)
11. Installation workflow
12. Daily job register view (serial list like 46101, 46102...)
13. Rental / buy-back (optional)

Phase 4 — Polish

14. WhatsApp reminders — payment due + stamping due
 15. CGST/SGST on service job
 16. HMS branding on all prints (Saidapet address, 99529 59595)
-

10. Requirement checklist

Requirement	Fulfilled?
Customer database	✓ Yes
Machine register with serial	✓ Yes
Service jobs with engineer	✓ Yes
AMC / Non-AMC	✓ Yes
GC / NGC warranty	✓ Yes
Spares + charges on job	✓ Yes
Stamping due reminders	✓ Yes
Sale enquiry → demo → convert	✓ Yes
Invoicing	✓ Yes
Quotation pad replacement	✗ No
Service report PDF (pink form)	✗ No
Govt stamping PDF + VC tracking	✗ No
Stamping quarter A–D	✗ No
Payment mode (GPay/Cash)	✗ No
Installation visit type	⚠ Partial
Chennai / Trichy branches	✗ No
Rental / buy-back	✗ No
Full website product catalog	⚠ Partial

11. How to pitch to the client

Phase 1 (now): One system for customer, machine, service, stamping reminders, and sales — staff stop re-typing; office sees who is due; engineers log spares and payment.

Phase 2 (next): The three HMS printouts (quotation, stamping chit, service report) so pink pads go away.

Demo suggestion: Enter **Kondattam Biriyani / serial 2025641** once → show stamping due → create service job → add Battery + Service + Stamping lines → show total.

12. Contact references (HMS website)
